# Marketing System Configurations

This chapter lists the operating system configurations supported in a system. It also lists the processor, memory, storage options available for this system. It will help the team in identifying whether a specific configuration is supported by the system.

## Supported operating systems

**Table 7. Operating systems**

## Intel processor technology

Latitude 7290, 7390 and 7490 series are built with Intel 8th Generation Core Processor and Intel 7th Generation Core Processor technologies.

- 8th generation Quad Core Processor
- 7th generation Dual Core Processor
- Intel 14nm Manufacturing Process Technology

**Table 8. Processor configurations - 8th generation Quad Core Processor**

Processor support list	UMA graphics
Intel Core i5-8250U (Quad Core, 1.6GHz, 6M Cache, 15W)	Intel UHD Graphics 620

Intel Core i5-7300U (Dual Core, 2.6GHz, 3M Cache, 15W) vPro	Intel HD Graphics 620

## Memory

Your computer supports a maximum of 16 or 32 GB of memory; however, 32-bit operating systems, can only use a maximum of 4GB of address space. Moreover, certain components within the computer require address space in the 4GB range. Any address space reserved

for these components cannot be used by computer memory; therefore, the amount of memory available to a 32-bit operating system is less than 4GB.

- Greater than 4GB memory requires a 64-bit operating system
- Only memory type supported: DDR4 SDRAM
- Not backward compatible with DDR3 memory modules

**Table 10. Memory specifications for Latitude 7290 and 7390**

## Primary storage options

Mobility Solid State Drives offer highly reliable, durable & lightweight storage. SSDs provide improved performance & operate quieter & cooler than standard hard drives.

Self-Encrypting drives provide hardware encrypted data protection which can be activated within a few seconds centrally & can be much safer and faster than software based encryption. Note: Encrypted drives require the system be configured in AHCI mode.

**NOTE:**

- SIM connector is 100% populated on PWA
- SIM feature support is tied only to (1) back cover with WWAN Antenna, and (2) Palmrest Chassis with SIM Tray Slot. Both of these decisions are at POS, not APOS.
- SIM Slot is not 100%, but tied to hinge up with WWAN antenna.
- WWAN antenna decision must be made at POS.
- No WLAN CUST kits

### Express Charge benefits

- For a battery advertised as having the ExpressCharge feature, the battery typically will have greater than 80% charge after about an hour of charging with the system off, and fully charged in about 2 hours with the system off.
- Enabling Expresscharge requires that both the Latitude notebook and the battery that is used on the system be ExpressCharge capable. If any of the above requirements is missing, ExpressCharge will not be enabled.
